GV Bandwagon

By Nicolas Heady, Michael Christensen, and Ryan Korteway

Accomplishments Planned

- Meet with someone from the Small Business Development Office
- Integrate Google Maps into our app
- Polish off the design on our views
- Integrate our payment system
- Research real-time pins locations
- Research advanced features
- Integrate notifications
- Draft our Terms and Conditions and our Privacy Policy
- Publish our app on the App Store

Sprint 2

✏️ **Edit Milestone**   ✝ **Milestones** ▾

🏷️ **Labels** ▾   🔀 **Hide Pull Requests**   🔥 **Burn Pipelines** ▾

📅 Start: **Feb 22, 2017** Edit   Due: **Mar 20th, 2017** Edit

◻️ weekends — ideal — completed

47 Total Story Points

42 Completed Story Points / 5 Remaining Story Points

9 Total Issues and Pull Requests

8 Completed Issues and PRs / 1 Remaining Issues and PRs

Accomplishments To Date

- Met with someone from the Small Business Development Office
- Integrated Google Maps into our app
- Polished off the design on our views
- Integrated our payment system
- Researched real-time pins locations
- Researched advanced features
- Integrated notifications
- Drafted our Terms and Conditions and our Privacy Policy

Features planned for Sprint 3

Whitelists and Blacklists for Riders/Drivers

Menus to show history (previous trips) as well as the current trip

Scheduling rides for Future Dates and Times, with repetition options

Sprint 3 Goals

Launch our app on the App Store

Integrate advanced features such as History and White/Blacklists

Market our app and solicit user feedback

Setbacks

Cobbling together a real time tracking system and keeping the maps loaded from systems not originally planned for such things

Not getting our app ready in time to put on the app store.

Setback Solutions

Very careful (AND REPETITIVE) testing of the offers and requests and making sure that the pins were moving in real time as time goes on.

Reaching out to the Small Business Office about their review of our various policies as soon as possible.
